> professional_profile

Ninth-term Smart Networks and Cybersecurity Engineering student focused on information security, infrastructure administration, backend development, and network automation. Hands-on experience in technical support, authorized penetration testing, findings documentation, and API development with Python and FastAPI. Analytical, adaptable, and collaborative, with availability for a professional internship starting in January 2027.

> technical_skills

Backend and data	Python, FastAPI, REST APIs, SQLAlchemy, PostgreSQL, SQLite, JWT, Pytest, and Random Forest.
Networks and automation	Cisco, Netmiko, Paramiko, LAN/WAN, Packet Tracer, and Nmap.
Security and systems	Linux (Red Hat and Kali), penetration testing, ethical hacking, access control, and risk analysis.
DevOps and collaboration	Docker, Docker Compose, Nginx, Git/GitHub, GitHub Actions, cloud, and technical documentation.

> professional_experience

SAN ANTONIO

April 2025 - July 2025

Technical Support

On-site

- Provided four months of on-site technical support, resolving hardware and software issues to help maintain operational continuity for end users.

LAVIS

April 2025 - July 2025

Cybersecurity and Infrastructure Intern

Remote

- Conducted authorized remote penetration testing on a server cluster, identifying vulnerabilities and infrastructure improvement opportunities.
- Documented findings and proposed mitigation measures to strengthen infrastructure security.

PROTECTPYME

2026

Backend Developer and Security Specialist

Cybersecurity training platform for small and medium-sized businesses using a 2D game, analytics, and artificial intelligence.

- Developed backend services and security architecture with FastAPI, PostgreSQL, and JWT authentication.
- Implemented analytics, Random Forest risk classification, and training recommendations.
- Collaborated on Unity integration and containerized deployment with Docker, Docker Compose, and Nginx.

Stack: Python, FastAPI, PostgreSQL, SQLAlchemy, JWT, Random Forest, Docker, Nginx, Unity, and GitHub.

NETADMIN API

2026

Backend Developer and Network Automation

Network inventory, monitoring, and administration system with a REST API and web dashboard.

- Automated device inventory, search, network scanning, and monitoring with Python and FastAPI.
- Integrated SQLite, change history, JWT authentication, and role-based access control.
- Added remote administration with Netmiko and Paramiko, a dashboard, PDF reports, alerts, and Pytest validation.

Stack: Python, FastAPI, SQLite, Linux, Cisco, Netmiko, Paramiko, HTML/CSS, Telegram, GitHub, and Pytest.

INDIE GAME DEVELOPMENT

Personal project

Programmer

2D minigames developed as a technical and creative learning project.

- Programmed with Godot and GDScript, organized scenes, and applied object-oriented programming principles.

Stack: Godot, GDScript, programming logic, OOP, testing, and debugging.

> education

UNIVERSIDAD TECNOLÓGICA DEL CENTRO DE VERACRUZ

B.S. in Smart Networks and Cybersecurity Engineering - In progress

Ninth academic term | Expected graduation: Mid-2027 | Relevant areas: Ethical Hacking, Information Security Management, Cloud Computing, and network automation.

UNIVERSIDAD TECNOLÓGICA DEL CENTRO DE VERACRUZ

A.A.S. in Digital Network Infrastructure - Completed

Training in technical support, network infrastructure, operating systems, and Cisco technologies.

> certifications_and_training

Cisco and networking

Ethical Hacker; CCNA Enterprise Networking, Security, and Automation; CCNA Switching, Routing, and Wireless Essentials; CCNA Introduction to Networks; IT Essentials.

AI and data

Preparatory Course for the Public Artificial Intelligence Training Center; Machine Learning and Data Science courses.

Systems

Red Hat System Administration I - RH124, Version 9.3.

Development

JavaScript, HTML, CSS, software development, and cloud.
